- **Use Chrome DevTools**:

  - Open the webpage and inspect elements.
  - Modify styles live in DevTools.
  - Check layout issues under "Elements" and "Computed Styles."

- **Network Tab Testing**:

  - Verify if `style.css` is loaded correctly.
  - Look for errors in console logs.

- **Simulating Screen Sizes**:

  - Test responsiveness with different screen sizes.
  - Adjust media queries as needed.
